

Balance Bike

BRUM BRUM

The name says it all. You can just see a kid pushing with her feet and saying, “Brum, Brum!” In the meantime, the child is learning to balance on two wheels, steer, and stop on a piece of award-winning, innovative design, intended to be flexible, fun, and safe.

Bike with one screw

A unique example of functional eco-design. The frame ensures a spine-neutral position when riding. It's made of high quality oak, walnut and birch plywood from Latvia.

It takes only one screw to hold it together.

Oak & Walnut

It is constructed from shaped oak, walnut and birch plywood, with solid duralumin wheels.

Walnut

Finger friendly

Built with puncture-proof wheels and to be "finger safe" for curious hands, the Brum Brum bike rethinks training wheels

Five element colors from Feng Shui

Feng Shui is a Chinese philosophical system of harmonizing everyone with the surrounding environment. Each element has its own colour and power. So does BRUM BRUM.

Special editions

For each season there is special editions.

Steering

The bicycle stem has a maximum steering angle of 45° which decreases the risk of jack-knifing accidents.

Grows with kid

And as the tykes grow, so does the Brum Brum—the wheels can be moved up and down on the front and rear forks to allow for longer legs.

BRUM BRUM can be adjusted for little riders whose inside leg height starts from 32 cm and up.
