THE PROBLEM

For questions please contact:
Jon Robbins

213-440-4884
Patent Pending Application No. 29/571,801

THERE ARE MORE THAN 60 MILLION REFUGEES IN THE WORLD RIGHT NOW.

And half of them are kids.

Thankfully, aid organizations are making sure they have the basic necessities for survival: food, water, and shelter. But we think kids need something more: they need play.

It is crucial to their development. Play imparts fundamental life skills, like teamwork, leadership, and communication. They learn how to win, and lose. And most importantly, they get to have fun. They get a bit of normalcy back into a life turned upside down.

But how do you find room for play equipment on a pallet that's transporting food, water, and medicine to refugees?

You don't...

THE SOLUTION

That's why we created PlayPallets, a revolutionary shipping pallet that is also a completely self-contained sports equipment system.

PlayPallets can easily be broken down and rebuilt into sturdy play equipment, without the use of any external pieces or parts.

Of course, PlayPallets were engineered to the same dimensions as standard pallets, can handle as much weight, and be transported by forklift just as easily.

Patent Pending Application No. 29/571,801

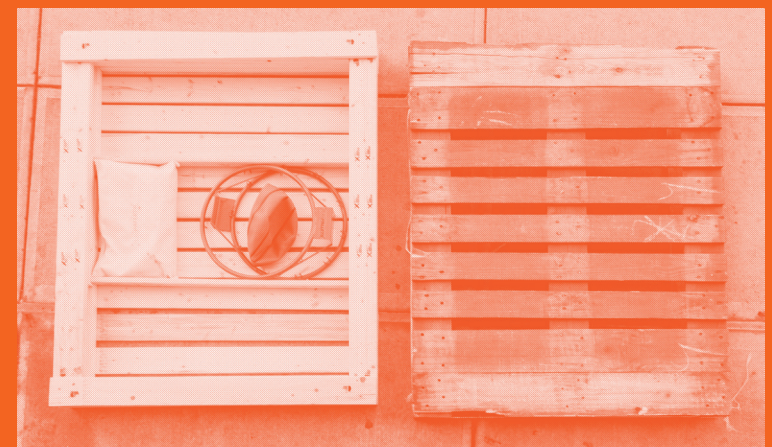

HOW IT WORKS

When a PlayPallet reaches the refugee camp at the end of its supply chain, the pallet is broken down based on instructions stamped onto the wood.

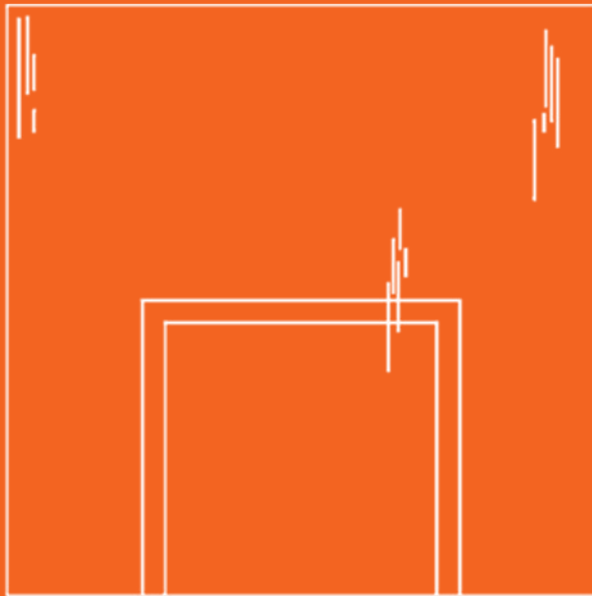

Every part of the PlayPallet has a functional role, and things like extra parts, hardware, and accessories are stored in an innovative center channel.

For instance, our Basketball model can be transformed into two youth-sized hoops, complete with rims, nets, and balls.

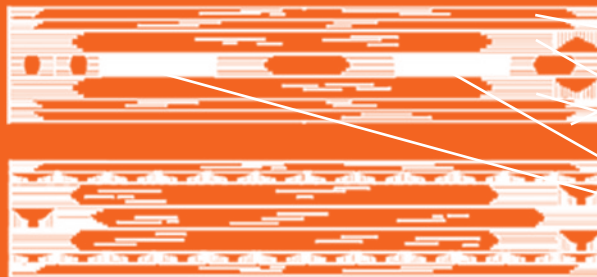

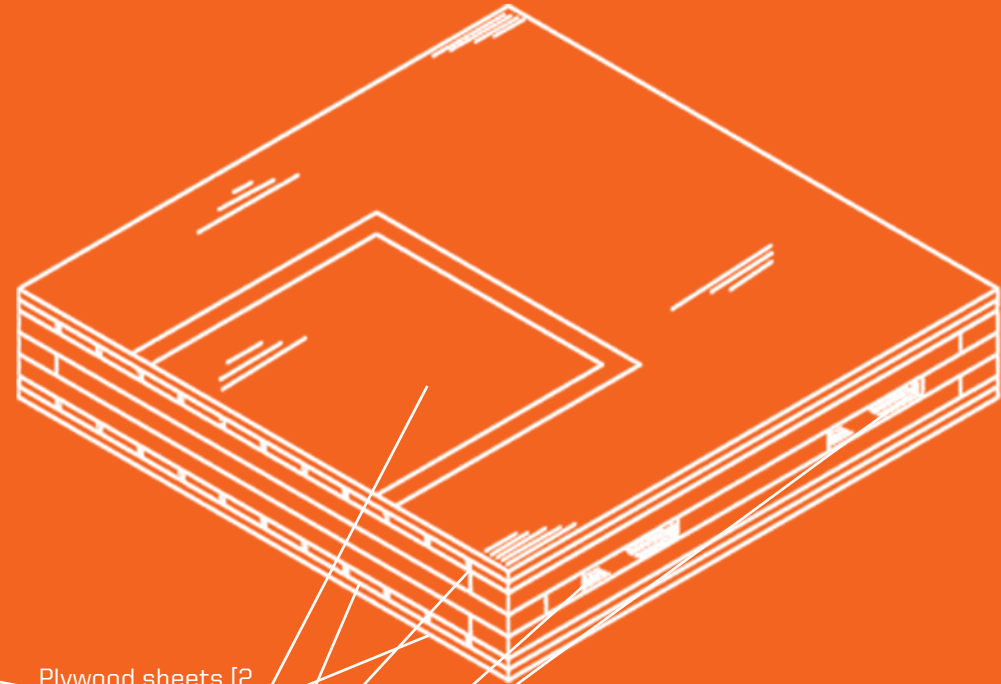

The beauty of PlayPallets is that we can provide an immediate, vital benefit to those who need it most. There is already a supply chain in place. We simply insert ourselves into that chain.

LET'S GO!

The refugee crisis won't be going away anytime soon. But if we can do one small thing to improve their lives, and simply let kids be kids, then we feel like it's an endeavor worth pursuing.

Kids live to play, so let's help them play.

That's what we're accomplishing, one pallet at a time.

THE SCALE MODEL

THIS BOX INCLUDES A 1:16 SCALE MODEL .

One piece is a PlayPallet in pallet mode, and the other piece is one of the two hoops that can be made from a PlayPallet. The pallet has a removeable top so you can see the center channel that is used to securely transport accessories, parts, and tools.

The actual hoops will be shipped with sandbags and cordage system for options for extra stability. And although each PlayPallet Basketball model can be transformed into two hoops, there is only one included in this package.

FAQS

WHY THIS PROBLEM?

It seems like small potatoes at first. With all the problems refugee children are already facing, focusing on sports equipment might appear frivolous, but it's the best possible way for us to get involved based on our limited skill sets.

We believe in the healing power of sports, the sense of normalcy that reliable play equipment can provide, and the importance that kids everywhere get the chance to be kids.

There are already many much more capable organizations working on the big stuff. We just want to help where we see a need.

WHY NOT JUST SHIP NORMAL PLAY EQUIPMENT?

Great question! It's hard to make an argument to give space on a shipping pallet meant for food, water, medicine, and/or clothing to a bunch of bulky playthings. So we decided to make the playthings become the pallet.

ARE PLAYPALLETS STILL EFFECTIVE PALLETS?

Of course! They are made out of heat-treated SYP and measure 48"x40", just like a standard shipping pallet. They have 2-way forklift slots, and can carry the same amount of weight.

WHY ARE THEY MADE OUT OF WOOD?

During the design and planning phase, we entertained various materials to be used in the creation of PlayPallets, but we ultimately settled on wood for a variety of reasons.

Wood is more environmentally friendly than other materials, and very widely available. It's workable by people in all cultures with very simple tools. And unlike specialty-molded plastic or metal, it can be easily repaired or replaced when it gets to its destination.

ARE THERE ANY OTHER MODELS BESIDES BASKETBALL?

Yes! We are currently developing skateboard, cricket, and soccer models of PlayPallets.

I GET THE BASKETBALL HOOPS, BUT CAN'T YOU PLAY SOCCER ANYWHERE AS LONG AS YOU HAVE A BALL?

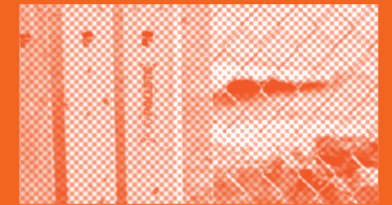

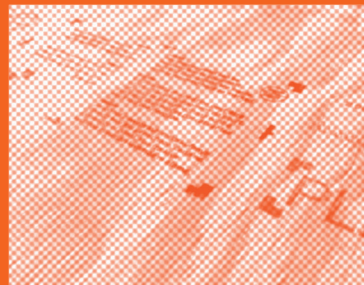

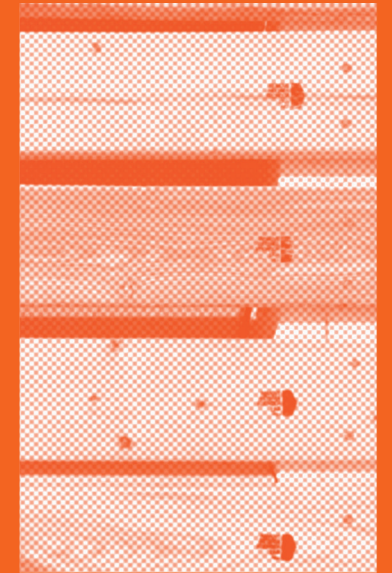

Yeah. For sure. But part of our goal is to help kids in terrible situations establish a bit of normalcy and to feel like they have stuff that is just for them. Sure, you can play a pickup game with some sticks as goal markers, but with dedicated, standardized goals, you can rely on them enough to play fair games, form leagues, and teach/learn with much more effectiveness.
