

Sutton Slide

A modular, city-first dog leash designed to adapt instantly to real life.

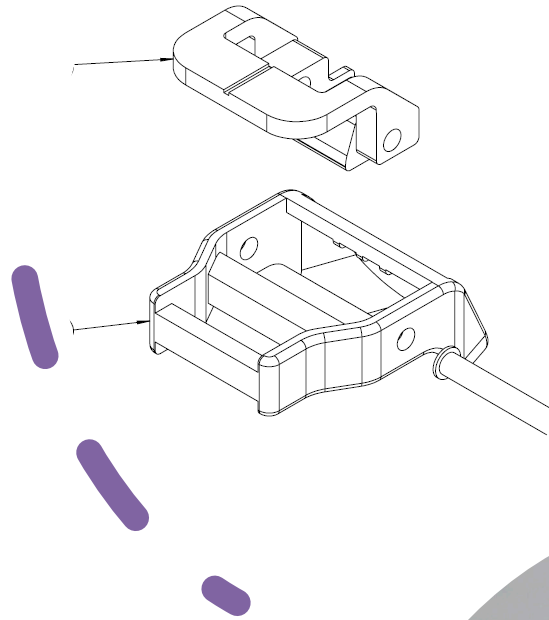

The Problem

- Urban dog owners constantly switch leash configurations.
- Traditional leashes are static and slow to adjust.
- Multiple products are often required.
- Leashes that try to do be universal use ladder lock buckles that are time consuming to modify

The Innovation: RemieLock™

- Patent-pending sliding cam lock mechanism.
- One-handed operation.
- Locks anywhere along the leash length.

One Leash, Multiple Configurations

Materials & Engineering

- Soft-touch PVC exterior
- Reinforced nylon core
- Swivel locking carabiner
- Nylon snap buckle
- Zinc plated steel and stainless steel RemieLock

Design Language

- Clean lines
- Restrained hardware
- Urban-first aesthetics

Why It Matters

- One product replaces many.
- Faster interaction reduces friction.
- Everyday systems should adapt to users.
